

# Which of the following option do you think is likely to have most positive impact in the organisation's digital transformation journey?

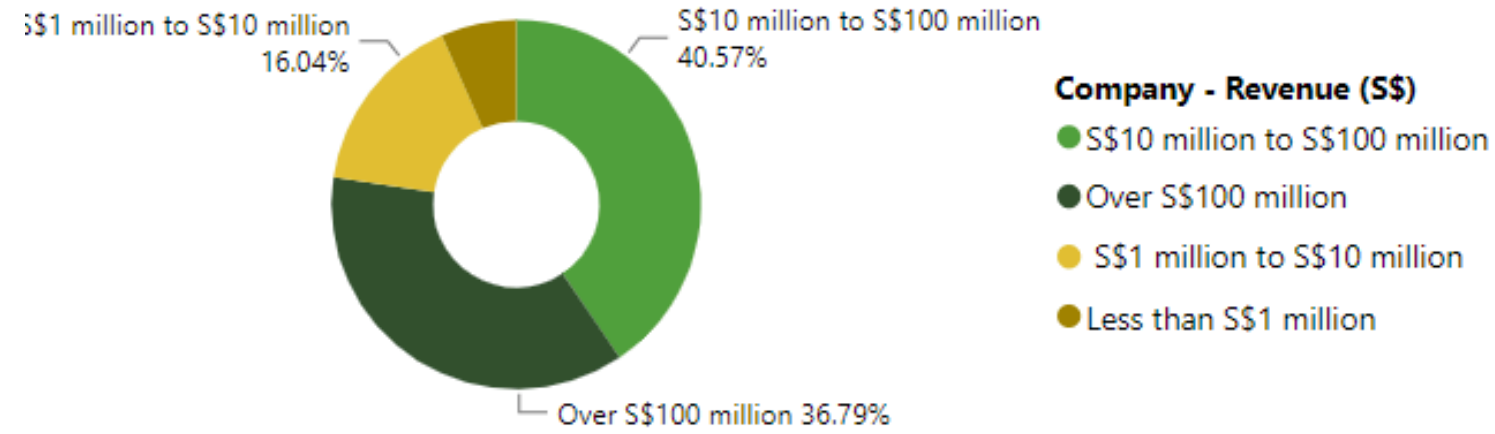

- Despite the prevalence of ERP/SAP or similar off the shelf IT solutions as a "comprehensive option" to trigger digital transformation, it is interesting a majority of the participants voted for a more conventional approach of mapping the existing processes and incrementally improving the same by adopting suitable digital technologies.
- In this scenario, implementation of ERP/SAP or any IT solution may only be considered if it improves the existing processes.

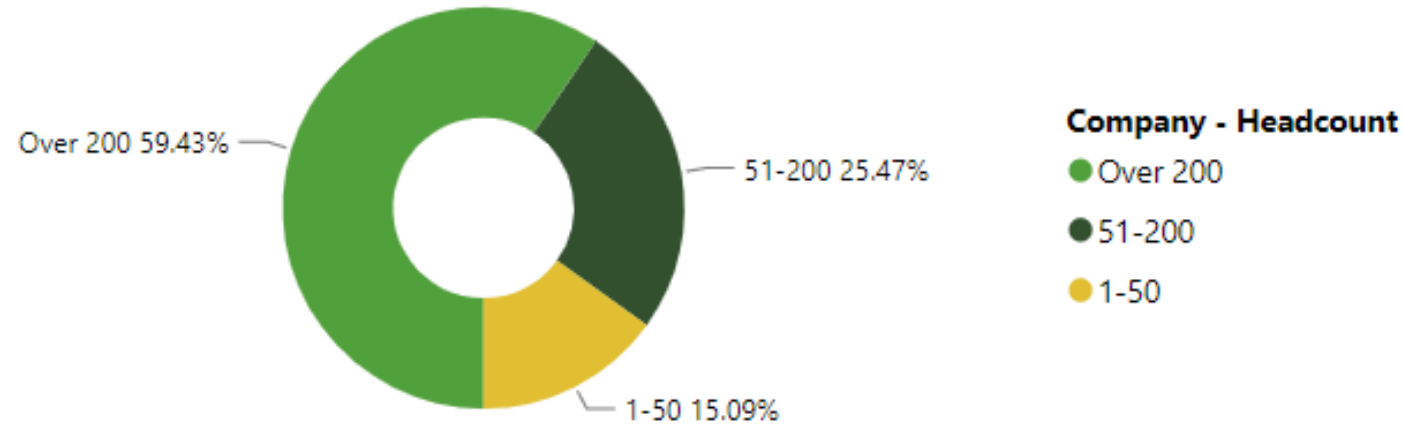

# SPECIMEN DATA ANALYTICS

## Stage 1: Primary Datasets

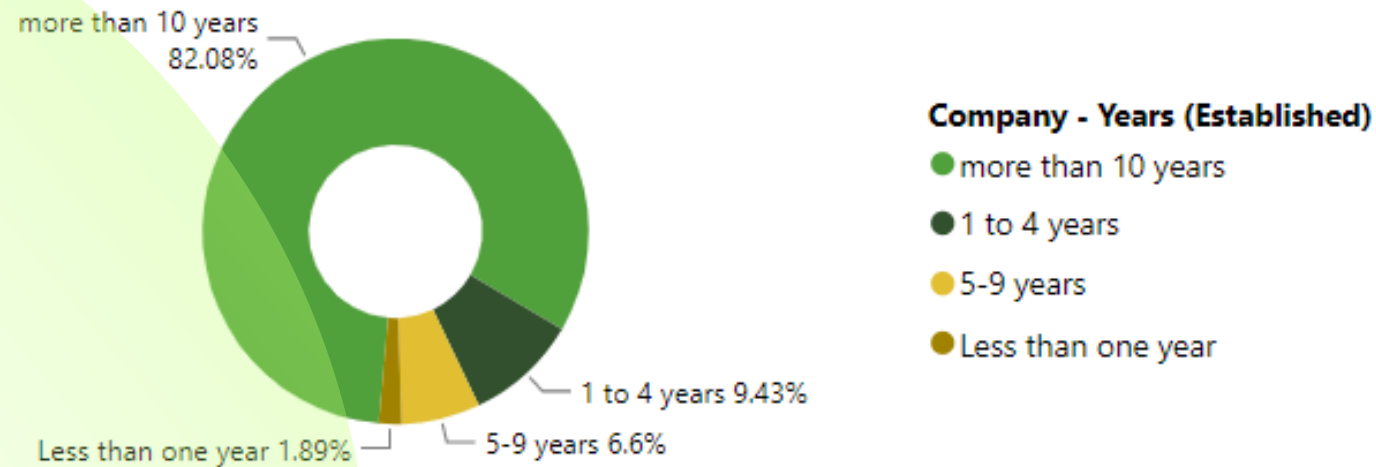

### Company Category by Company - Revenue (S\$)

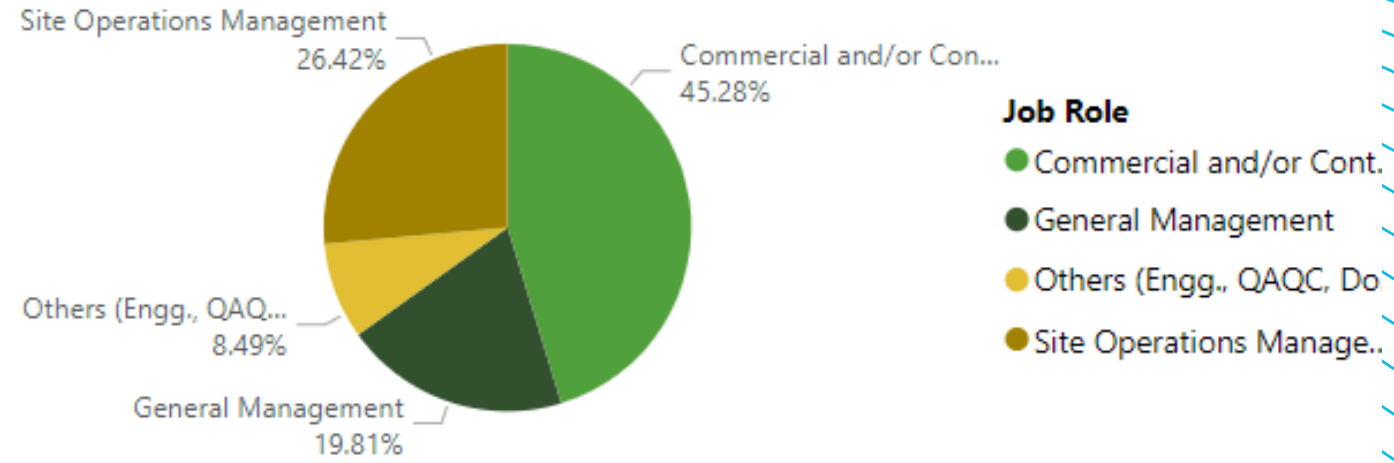

### Company Category by Company - Headcount

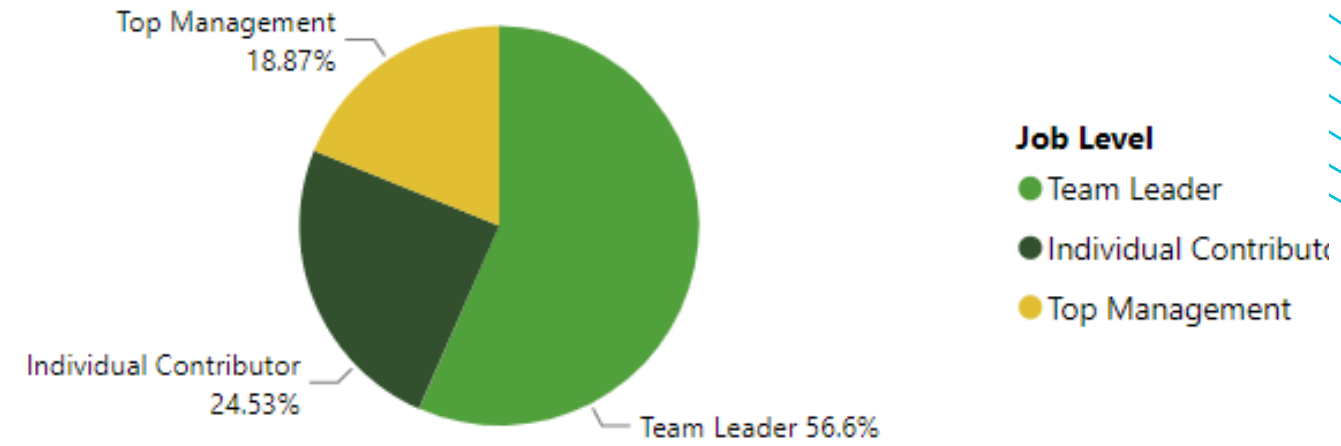

### Company Category by Company - Years (Established)

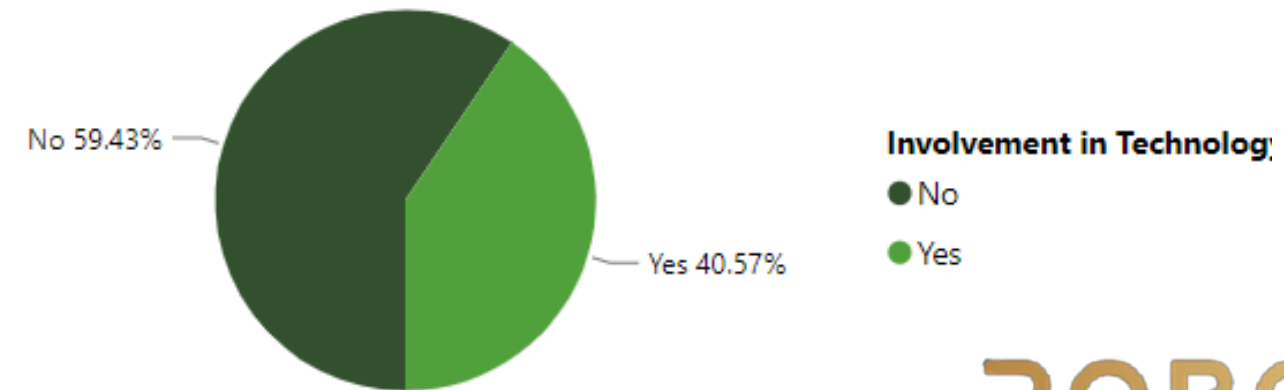

### Participant Profile by Job Role

### Participant Profile by Job Level

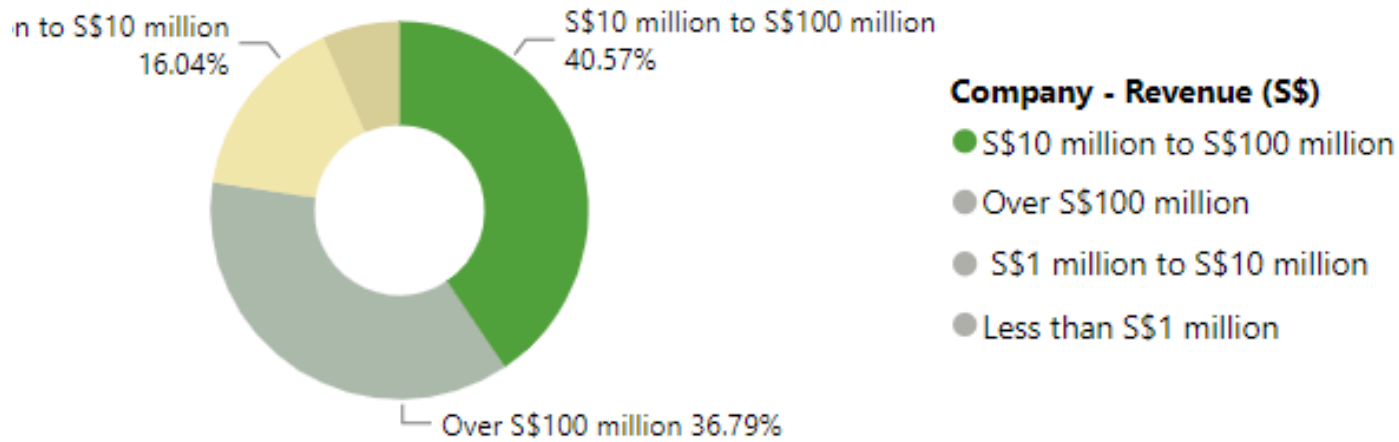

### Participant Profile by Involvement in Technology Adoption
